

## Make Every Minute Count with the WVHIN Portal

Better care starts with better data. The WVHIN Portal provides clinicians and their care teams with powerful access and insight to vital patient information, right when it's needed most.

Spending just one minute in the WVHIN Portal saves care teams dozens of minutes and unnecessary care visits down the line.

With comprehensive connections across the entire state of West Virginia and surrounding regions, providers can rest assured that WVHIN has the right information they need, at the right time.

### Extensive Statewide Access and Coverage

Just one look in the WVHIN Portal gives providers access to:

- 53 out of 55 of West Virginia's hospitals
- 90% of the state's federally qualified health centers
- Nearly all ambulatory care providers and urgent care clinics statewide, as well as a variety of other providers
- The West Virginia Statewide Immunization Information System (WVSIS)

WVHIN also exchanges data with national and regional networks including:

- Veterans Administration and Department of Defense
- eHealth Exchange
- Ohio Health Information Partnership (OHIP)
- Kentucky Health Information Exchange (KHIE)
- Carequality and Commonwell Health Alliance

### WVHIN's Impact Continues to Grow

- Nearly half a million WVHIN portal launches by providers in one year
- More than 1.7 million collective patients statewide
- 7,800 active users per week

*We use the WVHIN every day for transitions of care. We've found it to be exceptionally useful to get much needed patient information that we had no way to access before.*

– Population Health Manager

## WVHIN Portal—Your Partner in Providing Quality Patient Care

The WVHIN Portal is our streamlined suite of integrated clinical services, delivering essential, comprehensive patient information, alongside care coordination tools built to alleviate provider workloads and improve quality care.

With one log-in and password, the WVHIN portal provides information about a patient's medical history, including:

- Clinical information, including patient demographics, lab results, radiology reports, and transcriptions
- Continuity of care documents with relevant clinical information, such as medications, diagnoses, procedures, and results
- Information and alerts regarding recent care encounters, from inpatient to outpatient to emergency care
- Medicaid claims data to fill gaps in vulnerable patients' medical histories
- Advance directives and immunization histories

### Special Feature!

Use the WVHIN Portal's InContext app to integrate directly into the nation's leading electronic medical records: Epic, Cerner, Athena and eClinicalWorks

### WVHIN Encounter Notifications

The WVHIN empowers providers to make the connections needed to strengthen the health of vulnerable populations. Providers gain near-real-time notifications that alert them when patients visit an emergency department or are admitted to the hospital.

This helps providers respond faster to patients most in need of care management. It also supercharges success under value-based performance contracts.

**Today, the WVHIN sends more than 3.75 million patient health encounter notifications to providers each month.**

### WVHIN Portal Supports Population Health Initiatives

The WVHIN Portal is a vital support tool for care teams seeking to improve population health across the entire state's healthcare ecosystem. Some ways utilizing WVHIN increases impact include:

- Improving transitions of care and patient care coordination
- Supporting management of complex patients and chronic diseases
- Reducing readmissions and unnecessary medical tests and imaging
- Strengthening the identification of patients' social needs and their access to additional services

### Find Out More

WVHIN is the state-designated health information exchange (HIE), allowing healthcare professionals to share patient information electronically. For more than 10 years, the WVHIN has delivered HIE services for West Virginia healthcare providers and the Bureau for Public Health.
