WEST VIRGINIA HEALTH INFORMATION NETWORK

INTRODUCING *TIMELINE VIEW*: A STREAMLINED WAY TO VIEW KEY LABORATORY TESTING DATA IN INCONTEXT

WHAT'S NEW?

This new feature within *InContext* allows users to view a patient's laboratory testing data in a timeline format, enabling easy identification of trends over time.

WHAT IS STAYING THE SAME?

The *"List"* (classic) view of information will remain available. Users can toggle between the *"List View"* and the *"Timeline View"*.

USER BENEFITS

- Enables users to more easily **identify changes** and **see trends** over time.
- **Saves the user time** by limiting clicks and searches.
- Supports informed decision-making with **faster access** to relevant data.

In the *"Laboratory"* tab of the patient's *"Health Records"* page, users will see the original *"List"* icon. The new *"Timeline View"* icon is placed to the right of the *"List"* icon, enabling quick toggling between two views. Select the *"Timeline View"* icon to view available laboratory results. Default view is the most recent 3 months, with up to 5 years' data available to filter.
