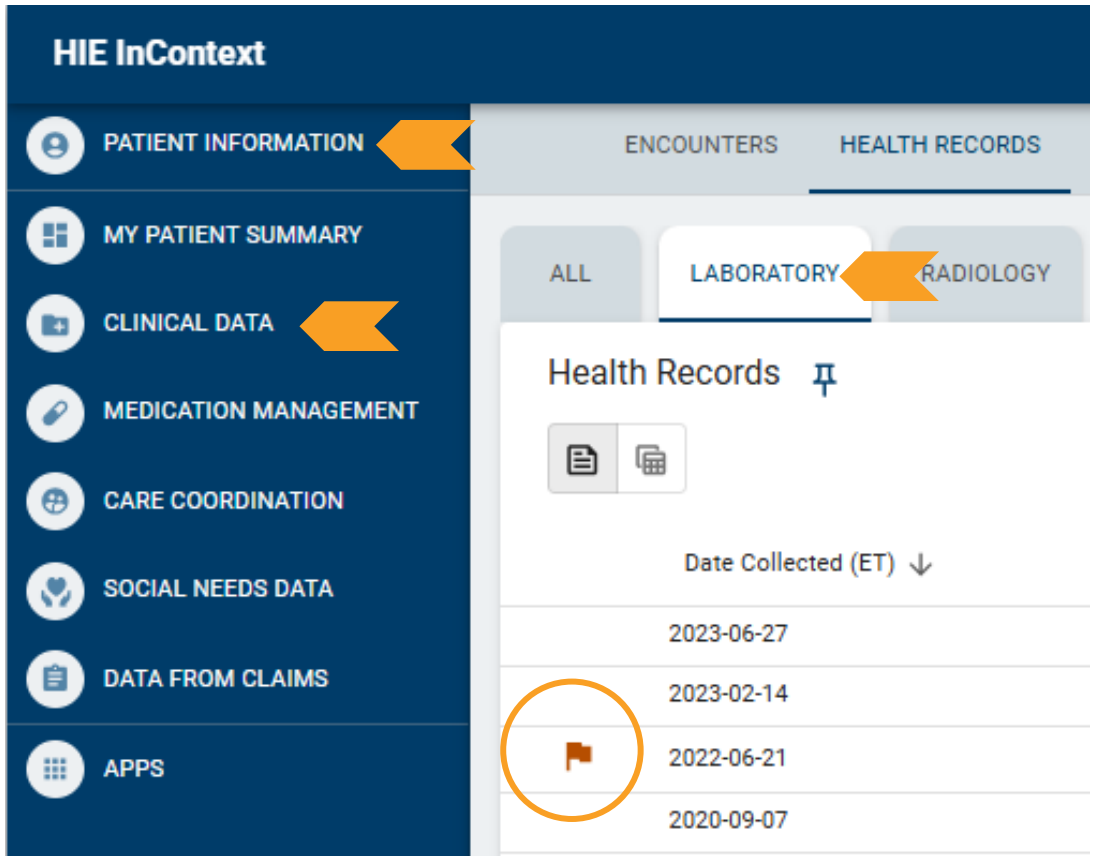
Helpful tips from the WVHIN

Finding Hemoglobin A1C in the WVHIN

1. Navigate to InContext
2. Select Clinical Data
3. Choose the Health Records tab
4. Click the LABORATORY sub tab
5. Select the lab result indicating HgbA1c to view results
6. The orange flag indicates a value that is out of normal range



Additional A1Cs may be found in CCDs or clinical notes as well. Users can also sort by description or do a "Search" for specific labs.
