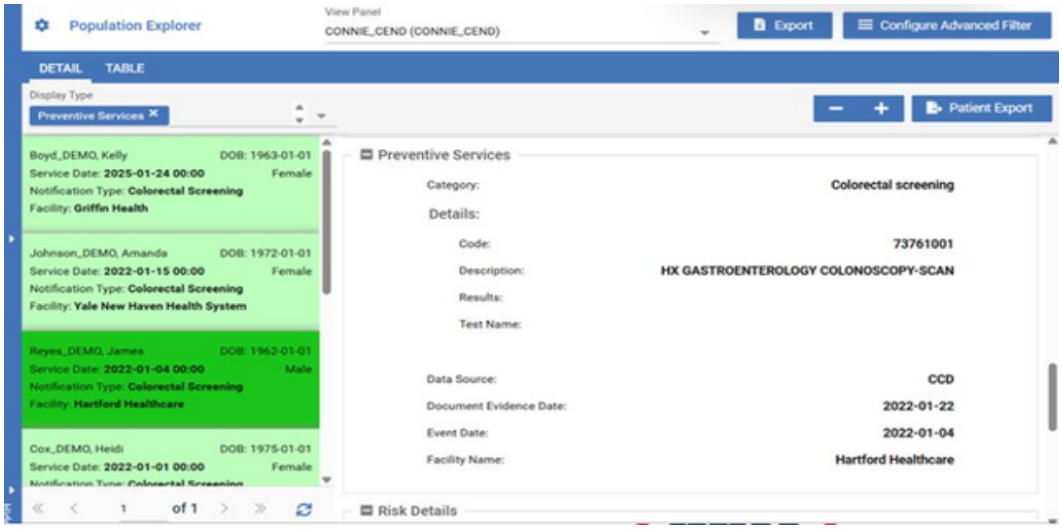
WEST VIRGINIA HEALTH INFORMATION NETWORK

POPULATION EXPLORER:
PREVENTIVE SERVICES NOTIFICATIONS

Supporting outreach efforts to close gaps in care

Users can select *Preventive Services* from the Display Type drop-down menu OR use the Quick Filter *Preventive Services Category* to view a patient list specific to that type of encounter.



In addition to the preventive service type, you will be able to see:

- Code from Procedure
- Code Description
- Data Source
- Document Evidence Date
- Event Date
- Facility Name

Preventive Services Field	Description
Category	Type of preventive service
Code	Procedure/diagnosis code if available
Description	Description associated with code
Results	Indicates whether results are available – currently blank for all records
Test Name	Additional test name available or title associated with diagnostic report
Data Source	Type of data source – CCD, ADT, Diagnostic Reports. Hover over this field for more information about where to find the corresponding document
Document Evidence Date	Date of the corresponding CCD (if applicable)
Event Date	Date of the preventive service
Facility Name	Facility reporting the preventive service

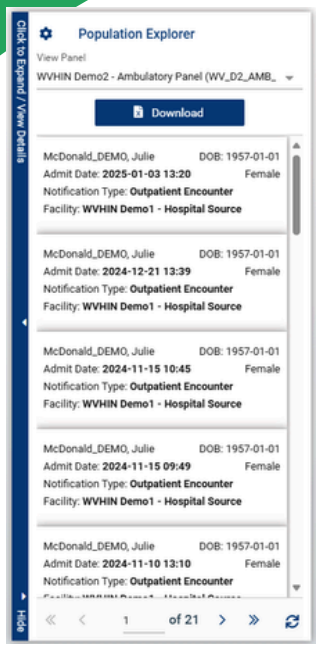
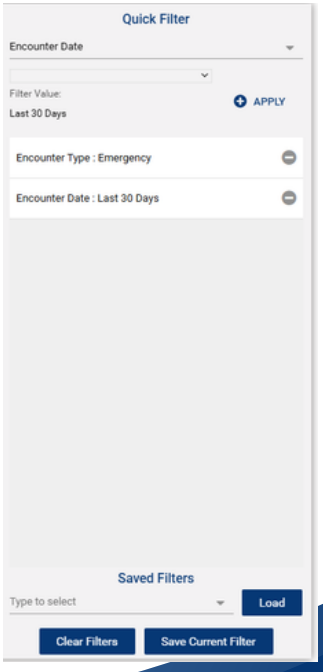
WVHIN
WEST VIRGINIA HEALTH INFORMATION NETWORK



Population Explorer is a powerful, user-friendly tool designed to help healthcare organizations better understand and manage the health of their patient populations. By bringing together data from across the care continuum, Population Explorer enables users to identify trends, close care gaps, and support data-driven decision-making.

Giving the ability to search and analyze preventive service encounters across defined patient populations, users can quickly identify which patients have received key preventive services such as colorectal cancer screening. This functionality supports proactive outreach, improves quality measure performance, and helps ensure patients receive timely, appropriate preventive care.

With flexible filtering options and actionable insights, Population Explorer empowers care teams, administrators, and population health leaders to target interventions, monitor progress, and ultimately improve health outcomes at scale.



For more information about Population Explorer, check out our Learning Resources page here, scan the code, or email outreach@wvhin.org for a demo!
